### **Masking in the Fire Stations**

Fire Departments may consider no longer requiring masks inside the station so long as all are vaccinated. (Masks should continue to be the standard for all public-facing activities including patient care.) We will need to continue to monitor the situation and may need to pivot to restore the mask requirement if we observe clusters of cases at the stations. If someone in the workspace is not vaccinated, then all should wear a mask regardless of vaccination status.

Thank you.

Tom Rea MD
